# Airtex Quilt Care Instructions

The following applies to all Cotton/Cotton Blend Airtex battings:

## Airtex battings are "Quilter Friendly" because...

- They have strength, yet are soft to the touch.
- Each batting is made of quality fibers for softness.
- All are needle-punched to enhance strength and durability.
- A Scrim is added on one side to discourage fiber migration through the fabric.

Pre-washing is a quilter's personal preference, but is not required. The first time you wash, you can expect 3% shrinkage. If you are not interested in shrinkage after your project is completed, please follow the easy "Pre-Wash" instructions below.

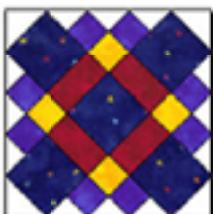

### Pre-Wash Instructions:

1. Pre-Wash by hand soaking in cool water for 15 minutes. **Do not machine wash, spin dry or wring mechanically.**
2. Squeeze out excess moisture by rolling in a dry towel.
3. Dry naturally by laying flat.

**Confidently tie or quilt 4"-6" apart**

### Our Rule of Thumb:

If you place your hand on the quilt, you should touch quilting.
